About Me & The Engineering Advantage

I bridge deep technical engineering, web security and search visibility—delivering sites that are fast, resilient, and built to rank. My background in cybersecurity informs every decision: secure defaults, minimal attack surface, and performance-first architecture.

Cybersecurity-grade Protection

Proactive vulnerability management, secure hosting configurations and threat analysis.

Clean, Performant Code

Modular builds, accessibility-first markup, and Web Vitals optimisation for real users.

Data-Driven SEO Infrastructure

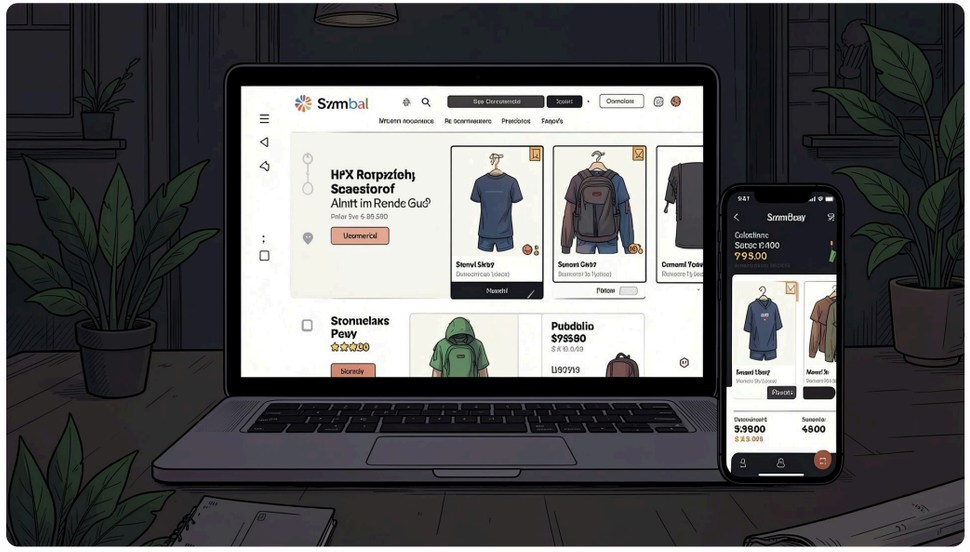

Technical audits, structured data and crawl-efficient architectures that help search engines index what matters.

Automated Workflows

Repeatable, testable automations that reduce manual work and close the lead-to-sale loop.

Made with GAMMA

Core Services

E-Commerce & Web Development

High-converting, fast-loading responsive storefronts and business sites focused on UX and revenue.

Technical SEO & Search Growth

Site architecture optimisation, audits, speed tuning and keyword engineering to increase organic visibility.

Business & Social Automation

Custom n8n workflows, WhatsApp automation and social publishing pipelines that save time and scale outreach.

Security & Infrastructure

Hardened hosting, continuous monitoring and vulnerability remediation for peace of mind.

Made with GAMMA

Featured Web & SEO Projects

Selected live sites—technical work that improved performance, resilience and conversions.

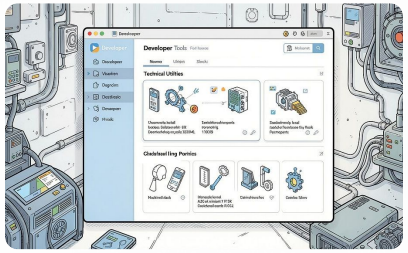

Krishnapriya Fashion

krishnapriyafashion.in — Scalable e-commerce platform, checkout optimisation, mobile-first performance improvements.

Rudra Grow

rudragrow.com — Performance optimisation, dynamic content delivery and SEO-friendly content structure.

AddSSH

addssh.in — Infrastructure hardening, secure hosting deployments and tools-focused UX for technical users.

Business Automation via n8n

Save time and capture more revenue by automating repetitive tasks. I build robust, auditable workflows that integrate your tools and keep data flowing reliably.

WhatsApp Order & Support Automation

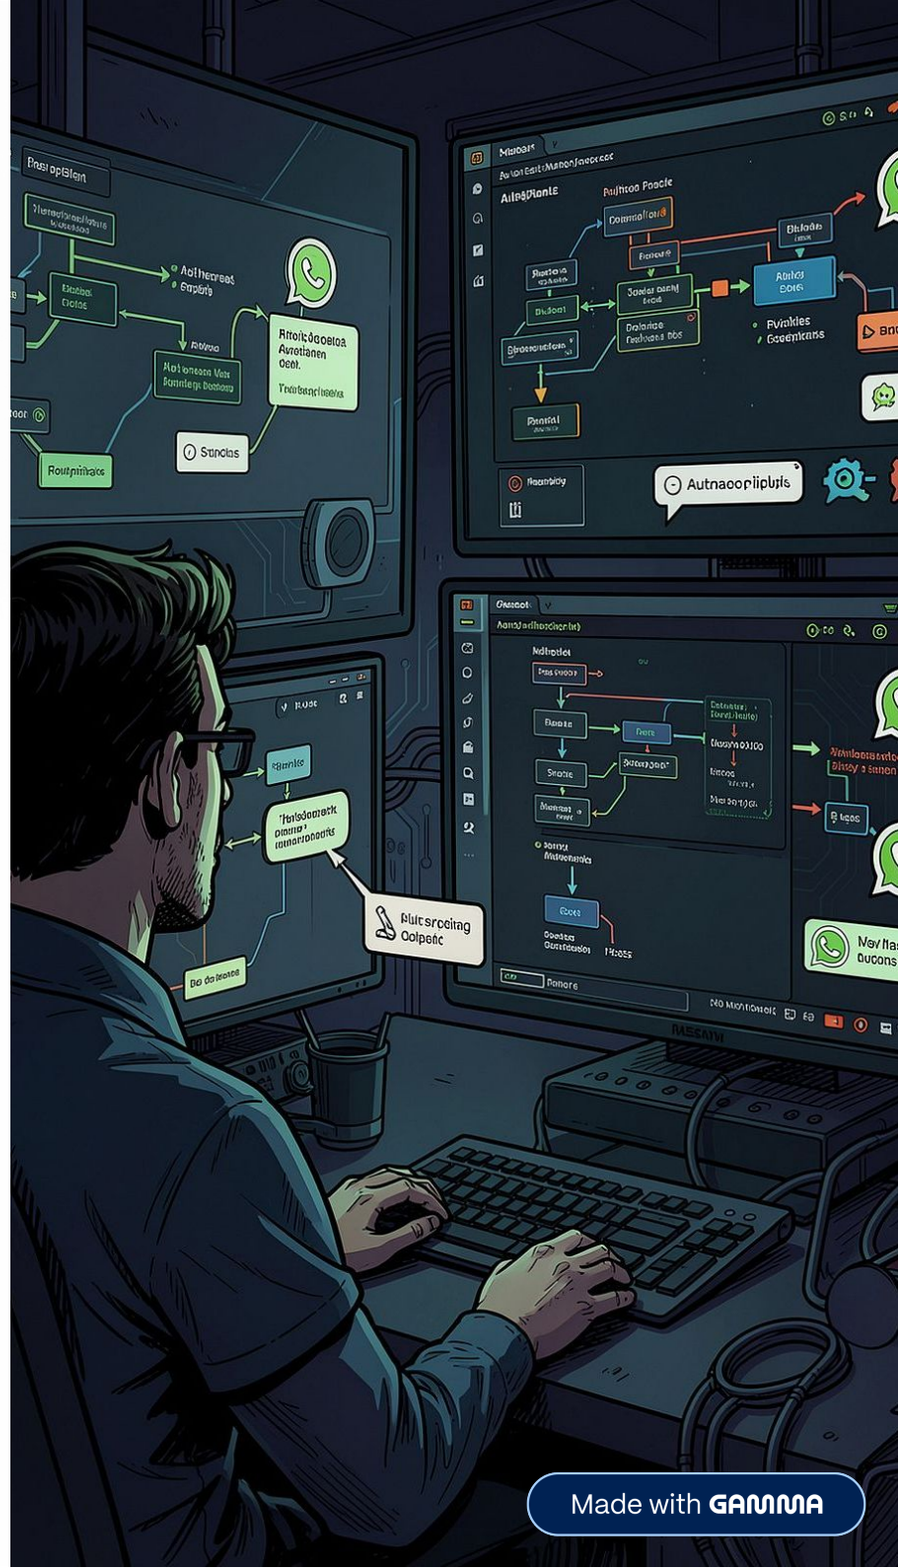

Automated acknowledgements, order updates and triage rules to reduce response time and increase conversions.

Social Scheduling & Cross-posting

Pipeline for content scheduling, cross-platform publishing and performance tracking.

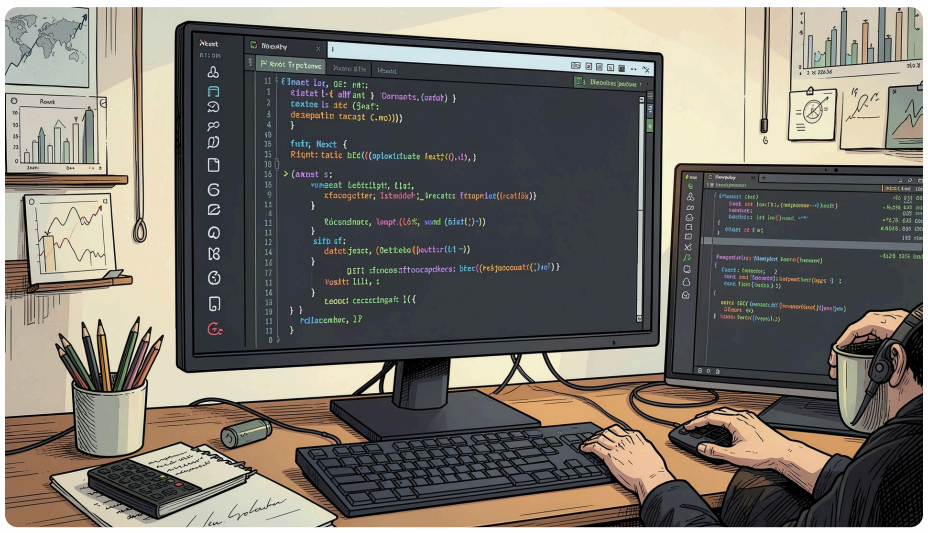

Lead Capture → CRM Sync

Reliable lead ingestion, enrichment and CRM synchronization with deduplication and error handling.

Made with GAMMA

The Technical Stack

Frontend

HTML5, CSS3, JavaScript — React & Next.js for SSR, fast time-to-interactive and progressive enhancement.

E-commerce Platforms

Custom storefronts and integrations with major platforms; focus on checkout speed and conversion funnels.

Technical SEO

Site architecture, structured data, canonicalisation, crawl budget management and Web Vitals optimisation.

Automation & APIs

n8n workflow orchestration, API integrations, event-driven triggers and monitoring with retry logic.

Security & Testing

Host hardening, penetration testing, secure CI/CD and continuous dependency scanning.

Why Work With Me?

Engineering precision meets business impact. I deliver solutions that reduce risk, improve search visibility, and increase conversions — measurable outcomes that matter to local businesses and e-commerce brands.

Security-First Engineering

Bulletproof configurations and code reviews to protect customer data and uptime.

Performance & SEO ROI

Faster pages, structured content and technical fixes that translate into organic growth and better UX.

End-to-End Delivery

From design and development to SEO and automation — single accountable owner for the whole stack.

Let's Build Your Digital Growth Infrastructure

Ready to audit your website, boost SEO rankings, or automate business workflows? I offer practical, technical audits and implementation plans tailored to local and e-commerce businesses.

1

Free Technical Audit

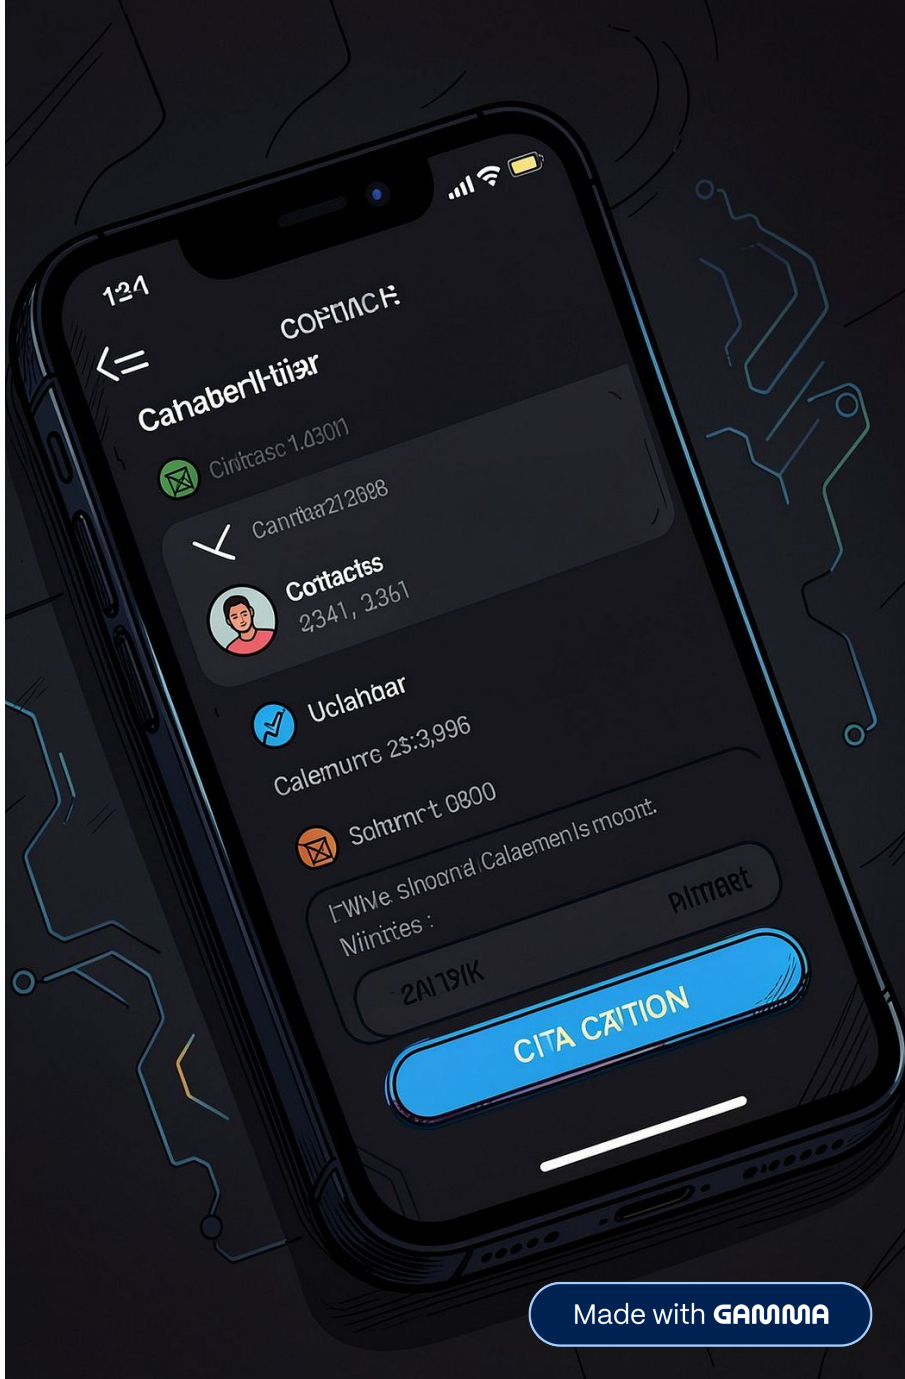

Schedule a concise audit covering speed, security and SEO opportunities.

2

Implementation Roadmap

Prioritised fixes, cost-estimates and phased delivery plan focused on ROI.
